

AMP™ Motorisation

*Rechargeable Lithium Battery Powered
Motorisation Solution*

What is AMP™ Motorisation?

AMP motorisation is designed to deliver next level innovation with a smart, seamless user interface offering convenient operation of your honeycomb or sheer shadings at the press of a button. A lithium rechargeable battery pack produces 500 up/down cycles per charge. This roughly equates to 9 to 12 months of battery life.

Low DC voltage with no electrician required to install.

~

Controlled via a 15 channel remote control, wall switch or APP using USB Bridge.

~

AMP™ USB Bridge allows bi-directional communication with shade position reporting & battery level status.

~

Voice control integration with Amazon Alexa, Google Assistant, Apple shortcuts and IFTTT.

Honeycomb Shades

Compatible Shades

Bottom Up Honeycomb Shades

Our most energy efficient window covering in a Bottom Up design where the shade lowers from the bottom to reveal the view.

Top Down Bottom Up Honeycomb Shades

Allows the shade to be raised from the bottom as well as lowered from the top, for complete light and privacy control.

Day-Night Honeycomb Shades

Enjoy the best of both worlds when combining a sheer and blackout fabric on the one shade.

Sheer Shadings

Whisper Sheer Shadings combine a series of tilting fabric vanes suspended between two layers of sheer fabric, offering the ultimate in light control and privacy.

Sheer Shadings

Operating My Shades With AMP™ Motorisation

Remote Control

The shades all feature variable speed control and can be controlled via a 15-channel radio frequency remote control. Available in white and black colour options, the remote includes a magnetic holder for mounting and can be programmed to activate a favourite position by a quick touch of a button or operate multiple shades at a time. Unlimited shades can be programmed onto the same channel.

A slightly different version of the remote is available for all Top Down/Bottom Up and Day-Night honeycomb shades allowing operation of the middle and bottom rails. Available in white only, this remote offers all the same features as the standard remote.

Wall Switch

A surface mount wall switch featuring a sleek design and large display screen is also available. The wall switch includes 15 channels and all of the same features as the remote.

Top Down/Bottom Up and
Day-Night honeycomb
shades remote.

Wall Switch

USB Bridge Delivers Wealth of Features and Integration Options

The 2.4ghz Wifi USB Bridge connects to a 5V power supply and can be placed anywhere inside the home offering additional features for the operation of your shades. Each Bridge can pair with 30 shades, each location can pair with 5 bridges and each location can have 20 rooms added. The USB bridge allows for bi-directional communication with shade position reporting, signal strength and battery level status.

APP Control for Smart Devices

A The USB Bridge offers the opportunity to control your AMP motorised shades via an APP on your smart device using three primary control types: Rooms, Scenes and Timers.

- Rooms allows you to group and operate your shades together. For example you could set up a Living Room which has 3 shades, and be able to group and operate these shades all at once from the room tab of the App.
- Scenes allows you to position multiple shades exactly where you want them with a single touch.
- Timer allows you to activate scenes automatically at desired times of the day. Scenes can be operated by clock time or be triggered by current local sunrise/sunset times.

Voice Control

The other exciting feature the USB Bridge offers is the availability of Voice control integration with Amazon Alexa, Google Assistant, Apple shortcuts and IFTTT. You can choose from several different voice commands with no remote or wall switch needed.
